

King County House Sales Project

Nicholas Muchiri Kinyua

Introduction

Problem Statement

Business Understanding

Main Objective

Develop a system that can automatically generate a detailed report of the system's performance, including the number of requests processed, the average response time, and the number of errors.

The system should be able to handle a large number of requests and should be able to scale horizontally to handle more requests.

The system should be able to handle a large number of requests and should be able to scale horizontally to handle more requests.

The system should be able to handle a large number of requests and should be able to scale horizontally to handle more requests.

Specific Objectives

- 1. To identify the specific objectives of the study.
- 2. To determine the specific objectives of the study.
- 3. To identify the specific objectives of the study.
- 4. To determine the specific objectives of the study.
- 5. To identify the specific objectives of the study.
- 6. To determine the specific objectives of the study.
- 7. To identify the specific objectives of the study.
- 8. To determine the specific objectives of the study.
- 9. To identify the specific objectives of the study.
- 10. To determine the specific objectives of the study.
